Ravikumar (Anna University,Head of the Incubation Cell), Mrs.A.Sneha Priya (CEO and Co Founder, Kidobotikz)

28 Aug 2016:

Kidobotikz in Association with the Anna University, Guindy organized the triannual Kidobotikz Robo Games. This event, in its 9th Edition, was one of the most extravagant robotics event conducted across the country. Aimed at generating healthy and tough competition between students, it consisted of 12 exciting contests- all related to the mechanical and programming fields. The most prominent event that captured the attention of the audience was "Robo Sumo" - a round robin event where two competing students square off their robots against each other. The two day event saw spirited participation from schools with students from some 50 schools competing against each other. Not just students, but the schools themselves were judged based on the strength of participation from their students.

At the end of this two-day affair, the schools that took home the most honours were PSBB KK Nagar and Jawahar Vidyalaya Senior Secondary School. Students from both the schools had participated in earnest and grabbed a number of prizes in the individual.

However among the two decorated schools, PSBB KK Nagar Students held a lead with their wonderful participation in several key events. This led to us being awarded with the Overall Rolling Shield Trophy. Charan, Omar, Chaitanya and Rohit were the students who received the award on behalf of the school. The Chief Guest for this event was Dr.Ravikumar, Head of the Incubation Cell. The Chief Guest was full of praise for the students and their schools for exposing students to such

important events. He emphasised on the need for students and schools to encourage more participation for students in events such as KRG. He lauded Kidobotikz for their efforts in creating an event format that cultivated healthy competition among the student community.
