

SOWING THE SEEDS OF ENTREPRENEURSHIP

The morning of the 28th of November 2017 saw the students of class 4 to 8 of PSBB T. Nagar assembled for a talk on something quite beyond their purview (or one would think) – Entrepreneurship.

Ms. Sujatha, an entrepreneur and a PSBB alumni, had been invited to the school for the session as part of the Diamond Jubilee celebration activities “Alumni Talk”. She kicked off the session by enlightening the meaning of the word- entrepreneurship. She then asked the audience to name a few famous entrepreneurs and those from India for which names like Dhirubhai Ambani and Jamshedji Tata were suggested. Ms. Sujatha was quick to point out that we had a very successful entrepreneur in our school itself, none other than our own Dr. Mrs. YGP.

She then described the qualities needed to become an entrepreneur as well as resources required. She emphasized the fact that having problem solving skills was a core necessity for an entrepreneur. After that, she spoke about how entrepreneurship can help the world at large.

The lecture was very clear and informative and though the children were quite young, they seemed to grasp the concept well.
