

AN EXCITING VISIT TO THE MUSEUM

Children of Std I of PSBB T.Nagar were taken on a field trip to Egmore Museum on 19th February, 2018. The exciting trip started with the cheer of the enthusiastic children. They were very happy on the way and curious to reach the venue. When the children reached the museum, they were overwhelmed to see the array of stuffed animals on display.

The children were taken around the zoology section at the museum. They saw different animals ranging from the 60 feet baleen whale skeleton to the stuffed birds from foreign countries under one roof. They were thrilled to see the replica of Tyrannosaurus that could move and emit sound.

Children were amazed to find most of the sea animals like the hammer headed shark and sting ray at the museum which they had only seen virtually. Children observed keenly as they got an opportunity to explore and gain knowledge with so much fun! Many of them were curious to know about the snakes, the elephant skeleton and the largest turtle on display. At the Dolls Section children observed the display of traditional dolls from various countries. They could relate to Origami exhibits from Japan as they have hands- on experience of paper folding in their art classes at school.

The trip was very edifying for the children and they had enough information to share with their parents!

Children were guided to write a report and illustrate their experience of the field trip.
