

## A.K.SAMBAN AWARDS 2018-19

The A.K.Samban Award for Creativity in Science encourages scientific temper amongst students and offers a huge platform to present their projects in various disciplines in Science. This prestigious award is given annually in honour of Mr. A.K.Samban, the first Principal of PSBB – a celebrated Chemistry teacher who inculcated an ardent interest in analytical Science amidst students. In memory of this UNESCO Award winner, this competition aims at promoting students to innovate, ideate and analyse Science by thought and cherish the world of discovery.

5<sup>th</sup> of December 2018 witnessed a hall of intellectual gathering; students from classes 6 to 11 showcased their Science projects.

The excitement started well in advance. Students began working on their projects months before and were all set to exhibit their models and findings. The hall was being prepared – it was filled with placards of elements and their applications and packed with charts and models. In brief, the hall seemed completely scholarly. In the morning of the exhibition, participating students couldn't resist their enthusiasm to reveal the results of the short time research in their respective project topics.

Dr. A. Kannan, Professor of Chemical Engineering, IITM and Dr. N. Seetharaman, Scientist at DRDO, Chennai, reviewed the projects and models. The best projects were recognised.

The thought provoking exhibition was wrapped up in the evening, when the enthusiastic kids went back home with their hearts filled with satisfaction and a sense of completeness in learning.
