

An Enjoyable Experience! Field Trip to Hatsun Agro Products Ltd.

On the 5th of December 2018, the commerce students of Classes 11 and 12 were taken on a much awaited field trip to Hatsun Agro Products Ltd., Kanchipuram. Starting out at 9:30 am, the students, accompanied by the teachers of the commerce department were full of enthusiasm, looking forward to their factory visit. The objective of the trip was to see how a manufacturing industry operates and learn about its working to complement their theory classes in Business Studies & Entrepreneurship at school.

It was a two hour bus ride to the factory. Once the students arrived, they were given caps and jackets to wear while inside the factory, in order to maintain hygiene. The tour began with the packaging room where goods were being sent on conveyor belts to various locations. This was followed by a visit to the testing room where students learnt about Methylene Blue Dye Reduction Testing which is done to assess the quality of raw milk. The tour concluded with a visit to the cold storage room which was $< 5^{\circ}\text{C}$. After a short break, a video about Hatsun and its products was screened in a conference room for knowledge enrichment.

The day ended on an exciting note with ice creams distributed to all the students and friendly 'goodbyes' and 'thank you's' exchanged with the Hatsun employees. The students returned to school by 3.30pm, tired but rejuvenated after their 'day out' at the factory in Kanchipuram.

"It was an interesting experience and we were happy to observe and imbibe the organizational and management skills of the employees there", said Siddharth. C.S, the commerce secretary PSBB Nungambakkam.
