

T3-Teen Think Tank

Teen Think Tank is a Diamond Jubilee initiative – an inter-school forum conducted by the PSBB Schools. This year it was held on 9th&10th January 2019@KKNagar. T3 encourages ideas and debates on national/local issues around us, with an aim of bringing out new, pertinent solutions. This year's theme was "Marina- Chennai's Coastline: Restoring its pride." To ensure comprehensive discussion, there were various sub topics, which were taken up by five councils comprising 16 students and 2 prolocutors each. These councils were: The Council For Protecting Marine Life, The Council for Tackling the Problem at the Source, The Council For Fishing Communities, The Council For Tourism and The Council For Small Businesses.

On the first day, students discussed and deliberated on various points and solutions pertinent to their committee. On day two, all of their ideas were put together into a power point presentation, which was presented to a panel of judges, consisting of experts in this field. The students were given an opportunity to answer questions raised by them and incorporate various inputs suggested by them ahead of compiling a dossier.

The Valedictory function was graced by Dr. GS Sameeran, IAS, Director of Fisheries, Government of Tamil Nadu, who was given a brief 2 minute explanation about each presentation, after which he inspired the students through a short, but powerful speech on thinking 'out of the box.' The best speaker from each council was felicitated and The Council of Tourism was adjudged as the "Best Council." Overall, the program proved to widen everyone's learning horizons.
