

Flying Friends

An interesting and informative programme on “Birds, our Flying Friends” was presented for the ISA project on the 12th February 2019 at the silver Jubilee Hall by the students from PreKG to Standard III. The programme showcased national birds of different countries from across the continents.

The event kick-started with an informative video presentation on the general characteristics of birds. The fancy dress show that followed in quick succession, enthralled the audience. A skit on migration of birds was thought provoking. The dainty peacock’s proud dance added a new dimension to the lively show.

A mini sanctuary was in place inside the hall. Information on different birds, proverbs on our feathered friends, different models of nests and bird mobiles adorned the silver jubilee hall. The programme focussed on measures that should be implemented to save the endangered species from becoming extinct.

The Chief Guest Dr. Juliet Decaestecker, a veteran Veterinarian, congratulated the efforts of the school and parents for their concerted effort to present a show of this magnitude.
