

REPORT ON CLASS PROJECT - BACK TO SCHOOL

STD ONE

9<sup>TH</sup> SEPTEMBER 2022

Return to school after the covid pandemic, although a welcome relief has presented many challenges. The best way to make students adopt is to make them happy.

**“Happiness is a journey, not a destination”**

Class One teachers decided to help students align themselves with the requirements of offline schooling by presenting a class project **“Back to School”** on September 9<sup>th</sup>, 2022.

The preparations began with deciding the flow, selection of students, practice sessions, PPT, placards, charts, etc.

The days event started after lunch break in the K G Hall decked up with charts and pookolam.

The programme began with a tableau depicting scenes from home & school, portraying and highlighting the expected behaviour in both the places. The take away from the show was vividly expressed by the students participating in the interaction at the end of each scene.

A simple yet a catchy song on the use of Magic Words was sung by the students as a reinforcement of values.

The days event came to an end with an oath taking ceremony. Students took a pledge to come happy to school, listen to the teachers and so on.

The follow-up activity was aligned with our ISO – SMART GOAL of quantifying the happiness quotient of the students. They were asked to exhibit their feeling by drawing their expression on the badge. Students were thrilled to adorn their SMILEY badges – a true expression of their happiness indeed!
