

Class Project by Std 2 students

PSBB T. Nagar

TYPES OF HOUSES

With the 'ELVES' - Emotional, Life skills, Values, Environmental and Social aspects of houses in consideration, Std Two students took the spectators – students, teachers and parents alike through an educational tour of different types of houses.

Welcoming the audience to the show!

Explaining the emotional connect!

The story of the “Three Little Pigs who built their houses with different materials.

Building a house using different shapes!
An important life skill!

Ancient houses have stood the test of time!
Let's value them!

Building sustainable houses is the need
of the hour.

Take a look at our model eco friendly house!

Houses built according to the climatic
conditions.

A house provides for happy interactions within the family and neighbours.-Social

Let's thank those who help us build our dream homes!

Final message – Home is where your heart is!

All those who attended the project understood that our homes are more than just steel and wood. They represent a place of belonging and happiness (Emotional), learning and being aware of how a house is built and the types and materials used (Life skills) where we appreciate the architecture of old houses while spending time with family and inculcating values of sharing, caring, gratitude and more (Values) built with materials that reduces our carbon footprint (Environmental). Besides interacting with all those who help to build our home, we meet friends and neighbours at our home. (Social).

It was a great learning time for all in the presence of the 'ELVES'
