

Session on Robotics

On the 25th of February 2023, a Robotics workshop was conducted at PSBB T. Nagar to mark the valedictory function of the Innovation Club for the students of classes 6-8.

The Chief Guest was Mr. Gunaseelan Ravindhiran, a renowned Robotics engineer from KITE (Kalam Institute of Technical Education).

He spoke about the necessity of robotics in this ever-changing world, the importance of learning robotics and the life lessons we obtain from learning this vast yet interesting topic. At the end, he also showcased his own robot moving in a live demo, which was very interesting and fascinating to watch.

Mr. Gunaseelan explained how Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate human actions interacting with digital systems and software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions. It was an edutaining and interactive session.
